Our date is reserved but they're having a new menu done so I can't get the choices or prices until the end of October. I probably won't be able to get them till after the November Fan is printed but I will have them at the Thanksgiving dinner and we'll send out a special E mail ( or mail ) notice as soon as I can get it. She did say most things are staying the same but she's adding and changing a few things so prices will probably be about the same as they have been. This is another dinner I need a head count for so , again, PLEASE CALL ME or let me know at the meeting if you can come. Come join us and welcome in the new year and start of even more fun Corvair activities!

Goodbye snowbirds!

Well, next week our snowbirds will be deserting Central New York. We can see what Ron and Gert do while they're in Fla. Does anyone have the "goods" on Nick and Jane?

We'll miss having you here but have a wonderful winter and enjoy a nice snow less winter. Be sure to send us news, pictures and articles of what you're doing down there in all that warm weather.

Have a safe trip and we'll look forward to seeing you in the Spring!

## TIM'S TECH TIME AND RAMBLIN'S

GREETINGS AGAIN, from my little shop in Memphis, NY.

Now the big annual panic is on , getting ready for winter. I am so wound up , I am not sure where to start on my own projects. Probably the rampside. Then I need to try to get paint on the coupe. I have most of the parts I need to do all the work on my vehicles here. The work list is a long one , and I hope it all works out.

I am finishing up the last project for some one else , then on with my dreams.

We just returned from our 33rd annual VT V I C E tour , which signals the end of the season for us. We had one rainy half day , and very scenic weather the rest of the time.

Ron Fausak is getting ready to head south soon , so if you have ANY parts wants from him , you better act soon. He is in a clean out mode , so go look . Or call him between 10AM and 3PM any days. Do not be afraid to leave a message , he will get back to you.

HIS number is (315)776-5852

In my spare?? time this winter I will be putting 2 extra FC motors back in shape. Both are 110hp motors , one is for powerglide , other is for Std shift. I also plan on getting a complete 60 motor running to sell. The original transmission (3 spd) and differential are available also. IF you want to save money , take word that it runs ok , and clean it up yourself , Call me soon for details.

The truck has served us well this summer with the junk Cylinder / piston setup I put on for now. I learned not to trust markings on parts , even new ones , from now on. I also learned what .030 pistons in .040 cylinders sound like (factory markings were .040!!)

The new motor has a different camshaft , new pistons that fit , and other upgrades. The whole powertrain that is now in the truck will end up in the infamous "Crampy" .The 68 95hp motor that is in the crampy now will be sold.

The coupe just needs paint and body work to be on the road. It runs great with the new motor etc. I do not remember how much more needs to be done to the lakewood .

I will be selling off a few things that are in my way , and I am sure I wont need soon. I will make a list . Right now I am fighting a cold that has me about flat!

The next big project is getting everything ready for winter. I am trying to get some amateur radio antenna work done before bad weather also. So my annual scramble is on again.

One thing that gets overlooked and old cars , is a good grease job , along with , of course , a oil and filter change. My last grease job , just before the last tour , surprised me with water from some of the joints. I must have missed a lube job this summer , plus we drove it in a lot of rain. I am now using a synthetic grease in a Lincoln power grease gun. If you buy a power grease gun , be sure to buy a good brand name., such as Lincoln, because I had reliable reports that the cheaper ones out there have plastic main bodies that the cylinder threads fail in a short time. They also say it creates a nasty mess when it happens. The Lincoln has a steel body, with good deep threads in it. Also watch any brand oil filters for that top plate spinning and blocking off the holes.. It is ok to install after making sure they line up , just spin the bolt , NOT the filter body.

Don't forget to register early for the Kalamazoo nationals , If you planning on going!! The host hotels ALWAYS fill early. It is MUCH more fun to be at the host hotel. Keep up to date at the C O R S A website. <http://www.corvair.org/>
