THE PREZ SEZ

Winter is still here in Central New York. I still have snow banks in my driveway that are 4 to 5 feet deep. Spring should have been here by now but its not. Hope to have a better weather forecast next month.

Car shows, cruise ins, and club tours will soon be here. In a few weeks I plan on attending a great show in Helen GA. I will probably meet up with Lenny and Sherry Smith as they only live a short distance from Helen. I am looking forward to this trip to escape the weather and snow in central NY.

The club will be going on tour the beginning of next month to the Brockway Museum in Homer NY. Tour is being set up by Lou and Clara Hallstead . Dave McCarty will be in charge of lunch after the tour. Looking forward to a good turnout of club members.

Our next meeting will soon be here, hope to see you. Phil CNYCC

CREAMSICLE NEEDS A HOME ——— FAST!!

Creamsicle is a kitty who adopted Ron at his shop and is now homeless. Mark is unable to care for him and Tim and I have been going there every couple days to feed and care for him. We know nothing of his past but he's not trusting of us humans. He's a good mouser and is excellent at using his litter box. He sometimes will let us pet him and he once let me hold him for quite a while but he's afraid and will sometimes turn on you. From his reactions I tend to think he must have belonged to someone at one time but maybe had been abused . I don't think he's a feral cat because he sometimes does come and want attention. If you have room at your home and a heart to care for this little guy please let us know asap. PLEASE, PLEASE, PLEASE help us find a home for this poor little critter.

And now no power there for heat

GEORGIA ROVING by Len Smith

Spring is finally coming to Georgia. Trees are budding and the grass is growing. The weather is warming up (mostly). We still get some yo-yo effect in our temperatures - 70s on Wednesday and 50s and rainy on Thursday. There have been car shows and cruise-ins scheduled, but the idea of sitting outdoors in weather in the 50s has not been high on our list of priorities. Our car club still holds a monthly meeting, so we get to socialize with them. Our March meeting involved preparing for our first cruise-in in April. Looks like we're good to go. I have also been meeting the "breakfast bunch" for breakfast on Tuesdays and Thursdays. We get together to solve all the world's problems and to discuss things automotive. We usually mall walk after we eat, so that we can walk off the calories. That's our story and we're sticking to it.

One sure sign of spring in this area is the resumption of the monthly swap meets at Atlanta Dragway. The first one of the year was held on March 7 and seemed to be a success. There were about 300 vendors and lots of spectators / customers. I met up with some of the "breakfast bunch" and we strolled the various aisles seeking the good deals. There were mostly Chevy and Ford parts (no Corvair), along with a selection of project vehicles. We spotted some projects for Ford fanatics, including a Falcon, a Pinto, and a Maverick, along with a pair of 40s Mercurys. There was a smattering of Chevys (a 50 and a 55), and an early Anglia waiting to be turned into a gasser. We also checked out the cars on display to see what people are driving. I took some pictures and put them on Member's Photos.

Brad, the organizer of the swap meet, is experimenting with a 2-day swap meet this month to try to bring in some larger vendors from farther away, so that they wouldn't have to drive and return on the same day. The dates were Friday and Saturday March 20 and 21 and seemed to be a success. I went on Saturday to check out the event. Some of the guys were there, so we wandered the aisles to check out the offerings. We found a number of new vendors along with some of the regulars. Camaro John bought a bunch of brake parts for his project, while the rest of us made smaller purchases. We looked over some of the projects for sale, such as a 38 Ford truck, an MGB convertible and a Datsun convertible, some Camaros (a Z-28 and a racer), a couple of early Novas, two mid-60s El Caminos, and a 55 Studebaker coupe. Good projects for someone who wants to build them. The display area was a little smaller than last time, but we found a few cars that we hadn't seen before. Check out the photos.

HELP !!!

We need someone to take over planning events for our club activities. If someone is creative and has time to plan events and tours it would be great — however it also could be rotated throughout the club members so that, first of all, no one gets burned out but also that we may get to see some interesting things in other areas that we may not even be aware of. I'll be happy to keep the information updated on the net and , of course, in the Fan . Six of the months have events in place each year. We need events or tours for the months of February, March, April, May, August and October for each year. Please think about it and let us know at the next meeting. Thank you!

TIM'S TECH TIME AND RAMBLIN'S

HI THERE ! Still working away in the shop most days. Last week , I decided to take a break and work on my own rampy. I changed the heads to reworked 66 110hp heads , and cylinders to .060 full fin Clark's units. I am waiting for a warm enough day to open the door and run it now. I finally added a much needed backup light. I also installed 4 new top line Michelin tires. The other ones were @12 years old and showing it. I have several such projects on a list of "to do" items for the truck. I ended up just changing the cylinders and heads instead of a whole new motor because I had such a busy winter.

We still travel to Ron's shop (@26 miles round trip!) to feed the orphaned cat every other day. He is still "watching the place" alone now. The latest hardship thrown at him is no power (heat). It has been turned off. Not sure yet what the family will do . The snow in front of Ron's shop is finally melting but it is still . It is not easy to get from the road to the front door. We still hope someone will take pity on him and provide a home for him.

Of course I am still working on the white rampside in the shop , but it has progressed to almost the end. I have still got some tricky details to finish up. The new motor runs very nice , but we have not had ANY weather good enough to let me run it very long yet. I do not like working in a shop with no heat on (as in doors open for ventilation) at @20 degrees or less. I have had so much apart on this thing , I cant wait to see how things are on the road.

My side project for a while now will be a 180hp turbo motor full rebuild. I started with a rather worn out core and other parts. I am not sure what the intended home for it is , but as long as the money keeps coming , I will keep busy building it.

While looking out in my "cold storage" area , I found several items that should be sold. There are heads for 64 110hp motors (including FC with exhaust rotators) , a set of 180 heads , a set of 140 heads , and several good cams with matching lifters , used 64 and 65up Cylinder /piston units that look very good (or I would not have kept them) , and many other motor items. It is time to clean out , so if you are building a motor , call me. I also have 4 early 13" wheels with used Michelin tires on them.

I hope next winter is not quite as intense as this one , with all the Corvair work and my ham radio activities.

We are looking forward to a busy year of shows next year , including the nationals in Knoxville, Clark's , and of course our VT tour in the fall.

The 65 black convertible that is for sale is a car brought here from California , so body is much better than most. It does have possible motor issues , but is very drivable. It has a lifter noise that stays there a long time (may calm down if driven), A possible head gasket leak when hot. The car LOOKS very good , with a lot of money spent on new top ,interior , and other items noted in a very complete notebook on this car. He really liked this car and enjoyed driving it around town. I have several more pictures , if you are interested. This car needs to be sold to settle the estate. It is at a condo garage in Baldwinsville NY.

I sure hope that the weather is better by the next time I write!!

THINK RECALL 2015 !!! (plan ahead)

Regards , Tim Colson The busy little frozen Corvair shop in Memphis NY.
