HAPPY NEW YEAR

TIM'S TECH TIME AND RAMBLIN'S

HELLO AGAIN from the very busy little Corvair Shop in Memphis NY.

Here we are again , still working out in the shop most of the time. At least now I am working on Corvairs. I have a turbo coupe with a larger than planned "punch list" apart now. I am also finally working on the Rampy. The weather gods let me shuffle cars around @2 weeks ago , so my truck is up on jack stands with no powertrain in it in the corner. The Cord is waiting to be picked up. The truck motor was running great , but using a lot of oil since it got super overheated on a trip . I am also cleaning up some of the damage caused by a large (@15 gallons) waste oil spill in the back. I only found one ring damaged and frozen in a groove. I replaced all. The full fin cylinders looked fine , so just a fast scuffing and washing was all they needed. The motor is almost all back together , but cleaning and repainting shrouds etc takes time. I also have a rebuilt rare late FC powerglide and 3:27 differential to try in it. Looks like the oil wrecked my special hand made wire harness also , so I will rebuild that. Cleaning the oil film from the engine compartment is a huge challenge for me. Several attempts to clean it at car washes and my own power washer with Dawn injected have helped , but it still is grungy. I also plan on changing the steering gear to a very low mileage one. I have to modify the shaft a little to fit the car wood wheel , and late car type signal light switch. I hope to clean up as much as I can , but the 25 plus year old paint job is starting to show its age in spots. Another improvement I made was to the lighting. It now has very bright L E D s front and back. Then I found some very bright L E D s that replace the dim dash lights. Amazing how much better the gauges are lit up now. I am looking into some newly available L E D bulb replacements for 1157 and 1156 bulbs for the Lakewood and coupe. They will be here soon. I can't wait to try them. Dim lights are a real problem on most older cars. My next attack will be the head lights. I have some German light bulbs to replace the originals , but I had to make modifications to the bucket assemblies to make them fit. In order to put them on the cars , I have to make the "cups" deeper , and water tight. On the truck it will be ok opened up. I will also run the headlights thru a relay with a heavy power wire from the battery. This will also let me set them up to run only with the ignition key on.. Another problem I want to fix is all the extra wiring for all of my "options" needs to be neatened up.

Some time this winter I hope to do a lot of work on the club display trailer. The motor needs one lifter replaced , it just will not break in , it calms down after running a long time , but is always noisy when started up. I plan on changing it . Then , since I have several here , I may change the trans axle to a late model powerglide . That way I can have it operational without worry about axle flanges falling out. (lates bolt in to the carrier assembly) So I want to add a dash with shift lever , tach , speedo , and a throttle lever . I think this would be a nice display at car shows .

I have been hearing from some new members that do not live close by. Some have interesting projects going on. I have some pictures from new member Everett Cook in Chazy NY (way up northeast) of his Greebrier project. He also has other Corvairs.

I also selected a few pictures from some of last years shows for this months picture page.

See you all next year.. This year seemed to go by very fast! our webmaster would like photos of your Corvair projects or the 2018 Recall to put on the www.cnycorvair.com website. If you have taken any , please send them to pics@cnycorvair.com members can register at : http://www.cnycorvair.com/cnycc_member_login.php

Our hospitality room opens at noon on Friday for munchies, Saturday morning at 8:00 with coffee and lots of donuts, breads and goodies. Grab a bite before going to the Saturday morning Concours and Car display. Judging will be until noon.

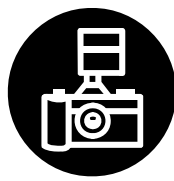

And for all registered Recall attendees we'll have our famous Saturday buffet lunch at 11:00 that includes an unequaled variety of sandwiches, chips, salads, veggie trays, fruit bowls and lots of great desserts. This will leave you plenty of time to enjoy lunch before the afternoon activities start. Door prizes will also be given out during the Saturday lunch. Come prepared for a technical drive for now it's time for the Autocross and Funkhana to finish the afternoon off. The model car display will also be this afternoon.

Saturday evening brings us to our awards banquet with a buffet loaded with goodies. Come and find out who will take home one of our 18 trophies. And who's car will be featured on our program cover, dash plaques and Saturday evening cake? Come and find out. You could be next!

As an alternative to any activities you may wish to visit Syracuse's huge Destiny Shopping Mall or a truly unique visit to the Erie Canal Museum on Erie Blvd.
